

Edilson Zau

Luanda, Angola

zauedilson@gmail.com | +264818779053 | edilsonzau.vercel.app | github.com/edilson-z

SKILLS

Python, JavaScript, Java, React, Flask, NodeJs, SQL, MongoDB, Firebase, Aduino, AWS

WORK EXPERIENCE

Freelance

Fullstack Software Engineer

May 2024 - Present

Remote

- Architect, develop, and deploy bespoke web and mobile applications for international clients using React, Node.js, and cloud ecosystems
- Manage end-to-end product lifecycles independently, leading client scoping, planning, testing, and continuous deployment

Didact Digital

Tech Lead

Jul 2023 - May 2024

Windhoek, Namibia

- Architected and launched the company website, resulting in an increase in client inquiries and establishing brand credibility in the Namibian tech market
- Spearheaded the development of an E-tendering Application that streamlined procurement processes
- Designed and implemented Jade Garden Digital Menu platform, boosting restaurant ordering efficiency and increasing average order value by 15% through strategic upsell features

Tololi Online

Head of Technology

Jul 2022 - Apr 2024

Windhoek, Namibia

- Led a cross-functional team of four developers, delivering 5 major systems with a 100% on-time project completion rate
- Architected and deployed web applications serving 1,000+ monthly users with 99.9% uptime, increasing customer retention
- Engineered data pipelines that processed customer data monthly, enabling real-time analytics

Tololi Online

Junior IT Manager

Mar 2022 - Jul 2022

Windhoek, Namibia

- Designed and developed a Multi-Vendor E-commerce Marketplace that onboarded 25+ local vendors in the first quarter
- Successfully secured copyrights for 3 core innovations, strengthening the company's IP portfolio
- Implemented SEO strategies that improved organic search rankings by 65% and increased web traffic by 40% within 4 months
- Provided technical support with a 100% issue resolution rate, maintaining an average response time under an hour for 50+ clients

Akilli X

Software Developer

Oct 2021 - Mar 2022

Windhoek, Namibia

- Delivered a responsive Mariental Municipality website used by 600+ citizens monthly
- Contributed to 4 key projects with 100% on-time delivery

PROJECTS

Namibia University of Science and Technology

Backend & Chatbot Systems Developer

Feb 2024 - May 2025

- Engineered a low-cost, offline-capable SMS chatbot engine to bridge the communication gap between rural smallholder farmers and institutional stakeholders
- Architected a data pipeline and dashboard that replaced paper reporting, enabling users on feature phones to submit multi-category agricultural data and empowering stakeholders with actionable visualisations to optimise resource allocation

Namibia University of Science and Technology & Varsity College

IoT & AI Systems Developer

Mar 2024 - Oct 2024

- Built an AI and IoT-enabled hydroponic grow tent utilising the Nutrient Film Technique (NFT) to automate and optimise leafy green crop production
- Developed an ML-driven climate control system using a Random Forest Classifier and multi-sensor arrays to stabilise grow tent environments against external weather
- Built a mobile application enabling farmers to monitor and manage real-time pH, nutrient levels, and environmental controls

EDUCATION

Namibia University of Science & Technology

B.Sc. Computer Science Honours (Software Development)

Feb 2024 - May 2025

GPA: Cum Laude
